

ERW PIPE UT WELD INSPECTION SYSTEM

The system offers an operator friendly approach to Ultrasonic Inspection and provide flexibility to apply to both of On-line and Off-line Ultrasonic inspection for most kinds of pipes as SAW, ERW, SPIRAL, and Longitudinal welded.

TECHNICAL FEATURES

- Multi Channel UT System
4ch / 8ch / 16ch / 32ch
- Programmable Settings
User oriented graphical display
- Paint marking Device
Flaw Detection
Loss of coupling
- Mechanical Sensor Head
Cylinder supported holder
PLC controlled Sensorhead
- Data Processor
Print out for each probe
Digital storage of test record
Calibration record
Network Link

OPTIONAL FUNCTION

- FULL BODY OF PIPE INSPECTION
- COIL STRIP EDGE INSPECTION

MEET TO MOST STANDARDS

- API 5L / ISO / ARAMCO / SHELL
